

ENRICHED AIR NITROX SPECIALTY

Who should take this course?

The PADI Enriched Air Diver course is PADI's most popular specialty scuba course. Why? Because scuba diving with enriched air nitrox gives you more no decompression time, especially on repetitive scuba dives. If staying down longer and getting back in the water sooner sounds appealing, then don't hesitate to become an enriched air diver.

Ask us how to schedule your next dive course!

ENRICHED AIR NITROX SPECIALTY

What will you learn?

You'll learn why diving with air that has higher oxygen and lower nitrogen content gives you more bottom time, along with enriched air equipment considerations. During a practical session, and two optional (or required) scuba dives, you'll:

- Discuss managing oxygen exposure.
- Practice analyzing oxygen content in your scuba tank.
- Set your dive computer for diving with enriched air nitrox.

Supporting Products:

Sign up for Enriched Air Diver Online – PADI's eLearning option – to get started immediately. The web-based system covers all the enriched air diver course content and allows you to study at your own pace through an easy-to-use, interactive program. You also have access to an online version of the *Enriched Air Diver Manual*.

You can also choose to read the *Enriched Air Diver Manual* and watch the *Enriched Air Diving* video for a more traditional approach.
